

5 Things to Know About the Health Catalyst Research Offering

The Health Catalyst Research Network™ and Health Catalyst Touchstone Match™

As a full-cycle research innovation ecosystem, the Health Catalyst Research Offering helps health systems safely convert and maximize their existing clinical databases, unlocking access to mutually beneficial industry and research partnerships and enabling clinical trials as a care option to reduce waste, improve outcomes, and increase revenue.

1

Enables the “final mile” of connectedness between health systems, biopharmaceutical companies, contract research organizations (CROs), and patients, closing the loop from research to healthcare delivery.

2

Delivers a curated network of healthcare provider systems, biopharmaceutical companies, and CROs.

3

Provides access to Health Catalyst products and services, Pop Analyzer™, Touchstone, and Healthcare.AI™ Expert Services.

4

Supports three key uses, including trial design, site feasibility, and patient engagement through the trial.

5

Maintains a national repository of highly granular, de-identified clinical data from Health Catalyst clients and third-party data sources with boots-on-the-ground knowledge of healthcare data.
