

SYMPTOMS OF WEAK OR INEFFECTIVE CAPABILITIES FOR POPULATION HEALTH MANAGEMENT

Analytics Systems Only

An information-centric approach with the idea that if we build it, they will come.

Best Practice System Only

Focus on academic research, with lots of published papers. Minimal practical application.

Adoption Systems Only

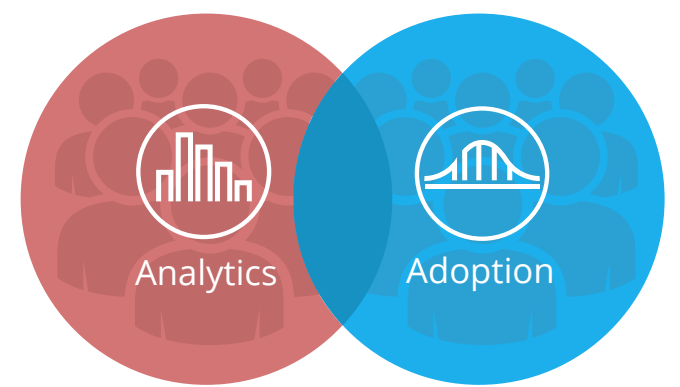

Infrequently encountered because it's a self-solving problem.

Science projects with pockets of excellence but limited improvement across multiple facilities.

Temporary improvements with limited scale. Ultimately not sustainable.

Processes have been automated but not improved. A paved cow path.

CREATING EFFECTIVE POPULATION HEALTH MANAGEMENT

A best practice system helps healthcare organizations figure out where they need to be.

An analytic system helps healthcare organizations understand where they are.

An adoption system empowers the journey.
